

# Carbon Reduction Plan

Supplier name: Rompa Limited

Publication date: 24<sup>th</sup> September 2024

## Commitment to achieving Net Zero

Rompa Limited is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2024</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
The emissions as calculated below are roughly split in thirds and comprise in the main: electricity and gas used in the running of the building and some of the plant held within (scope 2), fuel and mileage completed by the company fleet (scope 1) and employee travel overseas, combined with hotel stays whilst overseas (scope 3).	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
Scope 1	27.41
Scope 2	29.89
Scope 3 (Included Sources)	24.61

<b>Total Emissions</b>	81.91
------------------------	-------

## Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	27.41
Scope 2	29.89
Scope 3 (Included Sources)	24.61
<b>Total Emissions</b>	81.91

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 70tCO<sub>2</sub>e by 2029. This is a reduction of 15%

Progress against these targets can be seen in the graph below:

### Carbon Reduction: Projected vs. Actual

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2024 baseline. The carbon emission reduction achieved by these schemes equate to 11.2 tCO<sub>2</sub>e, a 13%ge reduction against the 2024 baseline and the measures will be in effect when performing the contract

Working with our waste partners, Biffa, Rompa has saved 11.2 tonnes of carbon emissions by diverting all waste from landfill. This includes: card, paper and general waste, which has all been diverted from landfill.

In the future we hope to implement further measures such as:

Rompa is planning on moving to more energy efficient premises in 2025 and will also be reviewing the make-up vehicle fleet at the next date of lease contract expiry. The use of hybrid vehicles will be assessed from 2027 onward.

## Declaration and Sign Off

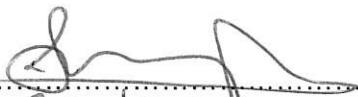

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>4</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>5</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>6</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
