About Rompa[®] and Snoezelen[®]

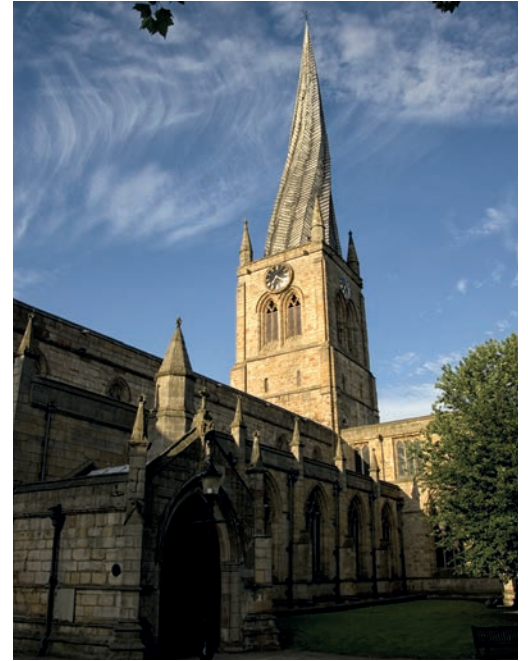

Rompa[®] is the exclusive provider of Snoezelen[®] sensory rooms. We have been designing Snoezelen[®] rooms and manufacturing sensory equipment for over 35 years.

Exclusive to Rompa[®], Snoezelen[®] rooms were the first and the original sensory rooms. Offering a range of products for sensory environments that are made and customised to meet individual needs. Aiming to provide service users the opportunity to **make choices, take control** of their environment, and provide independence – something everyone should be able to enjoy with the fundamental rights of **inclusion** and **equality**.

Formed by the Dutch words ‘snuffelen’ and ‘doezelen’ meaning to sniff, doze or snooze. Snoezelen[®] reflects the calming and engaging nature of these rooms. Dating back to the Netherlands in the 1970s, invented by psychologists Ad Verheul and Jan Hulsegge.

Snoezelen[®] rooms are designed to be versatile and beneficial to any setting, accommodating challenging behaviours to mental health, dementia care to occupational stress, prison & secure facilities. Generating calming atmospheres that can reduce agitation, anxiety, promote engagement, enjoyment and communication.

With growing awareness of neurodivergence, the Snoezelen[®] approach offers Life Changing Sensory Solutions for All.

Why choose Rompa®?

British Manufacturing

Rompa® is proud to be a British manufacturer and our expanding in-house Snoezelen® range is constructed in Chesterfield, Derbyshire. A wide selection of our Snoezelen® products are assembled in-house by our highly skilled team. We are compliant with ISO Quality Management Systems.

Free Design Service

To help you get the perfect Snoezelen® sensory room, after you submit a request, Rompa® will offer a totally free 3D computer-generated design of your room (see left).

Our team of in-house designers will provide a room design created to fit your specific requirements and budget.

Over 35 Years' Experience

For over 35 years, we have helped to improve the lives of people around the world and have built a brand you can trust. We are market leaders in our field and with that we bring wealth of experience and knowledge.

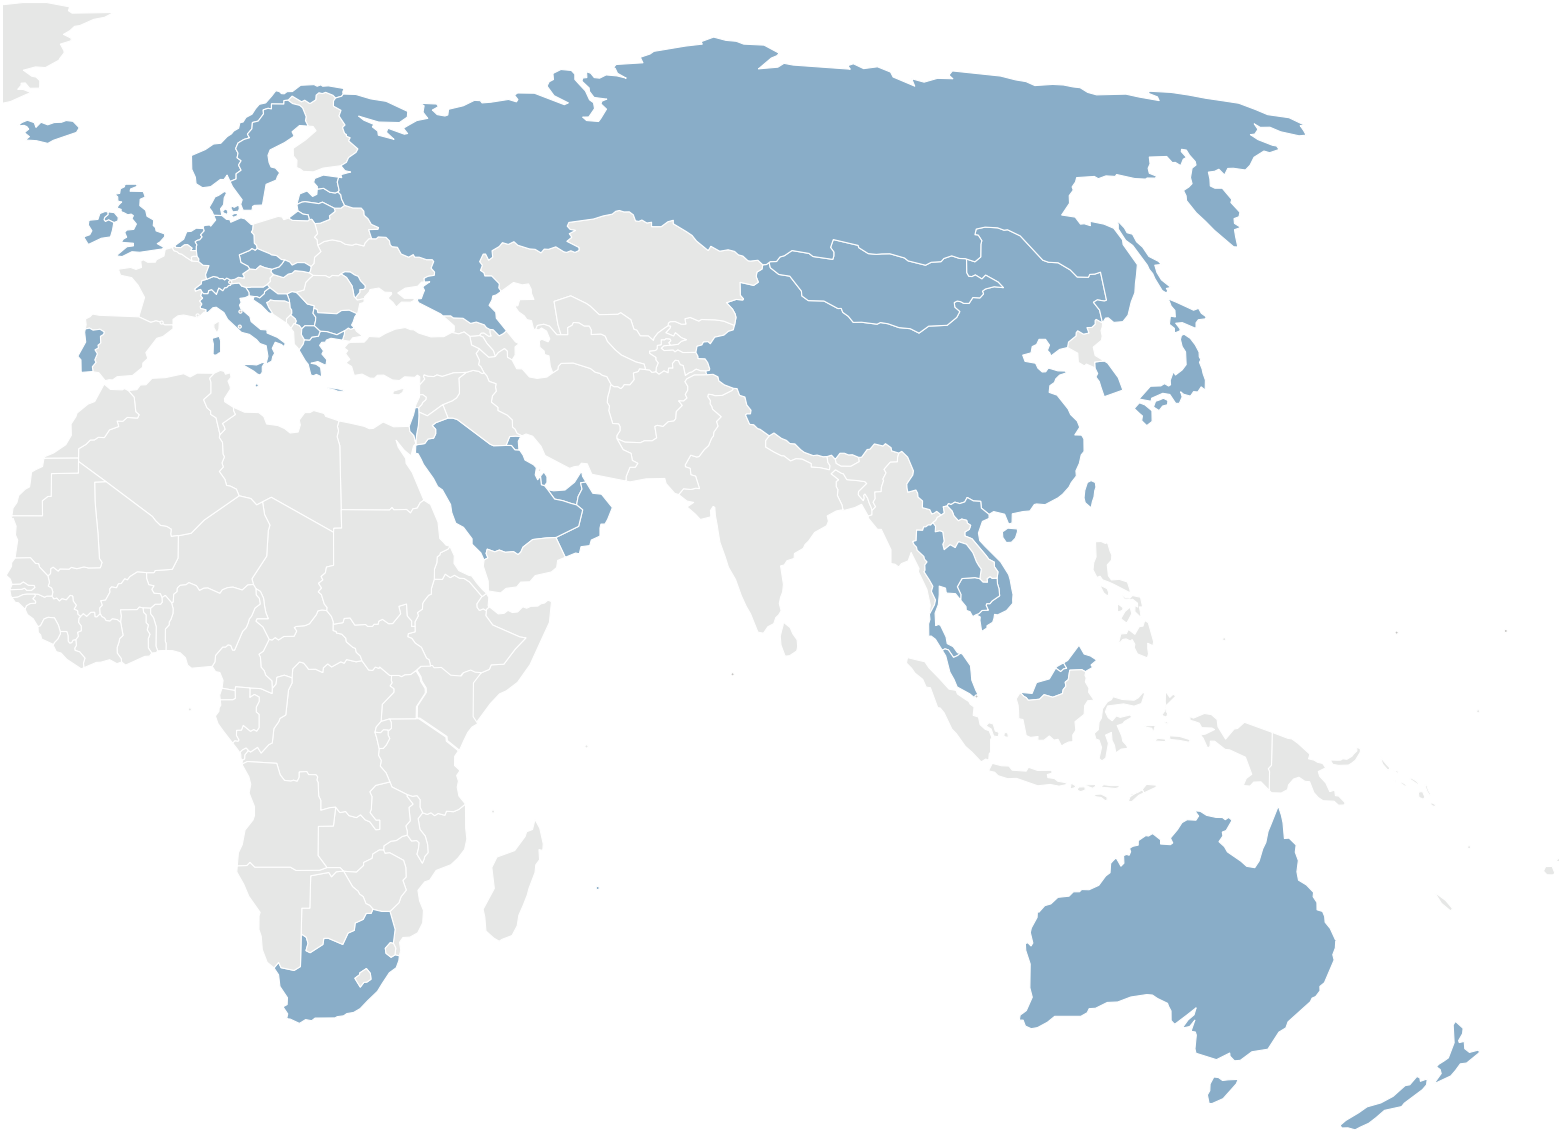

Rompa[®]

around the world

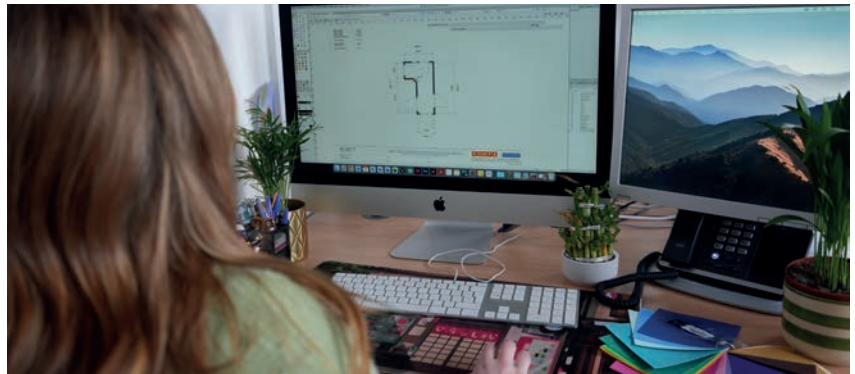

Over the last 35 years, Rompa[®] has worked hard to build an extensive network of over 82 trusted partners across 54 countries around the world.

Wherever you are in the world, Rompa[®] can provide a Snoezelen[®] sensory room to meet your needs – ranging from prison & secure facilities, to residential areas and airports and public Rooms.

People who may work on the project

Rompa® has a team of over 60 people including Researchers, Product Developers, Purchasers, Craftspeople, Sales Advisors, Designers, and Installers. These skilled professionals ensure we produce the best quality products and sensory environments.

Rompa's® Sales Advisory Team

The experienced team of Sales Advisors are available to meet with you and discuss your requirements. They are there to listen to your needs and make suggestions to help you to achieve your goal, rather than to simply sell you products.

Rompa's® Design Team

The design team are the most creative when it comes to creating bespoke environments for small-scale to large-scale projects. The team work with your ideas and feedback provided by our advisor and will create an environment that is just right for your needs. Lots of companies will attach a charge to their design service, but Rompa® doesn't. We want you to choose our design, not because you have paid for it, but because it's the best.

Rompa's® Production Team

Rompa® is home to many skilled people at our production site. The team consists of expert machinists, woodworkers, and electrical specialists who work very closely together to produce the highest-quality products made at our site in Derbyshire, UK. All this means that whenever you buy a bespoke product, a Snoezelen® sensory room and equipment from Rompa®, you can expect only the best.

Rompa's® Installations Project Management Team

The Installations Project Management Team will support you in managing your project from plan to reality. They are the team behind the scenes that will answer your every question and help you complete your project.

Rompa's® Installation Team

Rompa® has a team of qualified installation engineers. The expertise held by our engineers and management team means that we don't have to rely on third-party resources. This allows us to always be confident that we are giving our customers a high-quality result.

These include:

- ECS/CSCS
- 18th Edition Qualified Electricians
- PAT Testing
- Working at Height
- Manual Handling
- First Aid

Rompa® is also **SSIP** and **Acclaim** accredited, which means that we work to all relevant health and safety guidelines, both during installations, in the work that we do and the procedures that we follow in our manufacturing facility.

Our specialist advisors

Rompa® works closely with specialists who provide valuable insight into ensuring any Snoezelen® equipment we provide will meet the highest standards required for the needs of the users. Our specialists work independently from Rompa® but have a fantastic amount of knowledge in the field of Snoezelen® equipment and its use.

Our panel of experts is ever expanding, this way we can better produce and provide the best and most appropriate products for our users.

Trevor Cotterill

Trevor Cotterill is a Senior Lecturer in Education Studies and SEND (Special Education Needs and Disabilities), a Lecturer in Further Education Collaborations and Stage 3 Progression Leader for BA (Hons) Education Studies. Trevor has over 40 years of teaching experience in secondary schools, further education, and higher education.

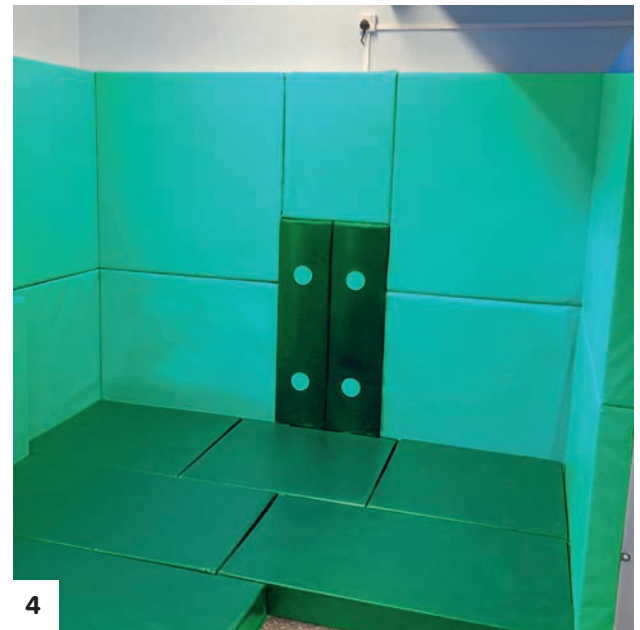

Trevor's research includes SEND, including autism and ADHD (attention deficit hyperactivity disorder), professional development for practitioners working with learners with SEND, the role of neurobiology and cognition in autism, and the influence of neuroscience and learning.

Lesley Collier

Lesley Collier, Ph.D., serves as an Occupational Therapist in the Faculty of Health and Well-being at the University of Winchester.

Specialising in sensory integration and cognitive impairment, she actively engages in both national and international research initiatives focused on sensory processing and stimulation for individuals with cognitive challenges.

Lesley's expertise and leadership have significantly contributed to advancements in this field.

Different types of Rooms

1 **Snoezelen® Sensory Room**

Snoezelen® rooms offer a relaxed atmosphere with pleasant surroundings, soothing sounds, captivating aromas, tactile experiences, massage and vibration, vibrosonic sensations, and gentle movement with interesting light effects and comfortable seating allow the user to self regulate by choosing sensations.

3 **Soft Play**

A soft play environment is specifically designed users to have fun, explore their physical boundaries and to release energy in a safe environment.

2 **Sensory Integration**

A form of Occupational Therapy utilising sensory experiences from movement, touch, light, and sound to strengthen the user's ability to deal with everyday life.

4 **Snoezelen® De-Escalation Rooms**

Our custom-made and fully installed facilities offer a safe environment for those who present challenging behaviours and aggressive tendencies and giving them an opportunity to calm, rest, recuperate and recover in a secure and robust environment.

An experienced Sales
Advisor will visit you at
an agreed date and time
to take measurements
of the room and find out
more about your needs.

Quote

We will create an itemised
quotation for your project
so you can understand
where your investment is
being placed and make
amendments if required.

How we work

We'll Manufacture

Based on the site survey our manufacturing team will produce the items and equipment for your project. The lead time for this is typically 6 weeks. Need it quicker? Contact us to find out if we can produce it sooner.

We'll Train

Where possible we will train you immediately after installation. We want to leave you with an environment that you know how to use and maintain.

6

Site Survey, If Required

Our trained installation team will visit the dedicated room/ area and carry out a site survey taking accurate measurements of the area so we can manufacture to the correct specification.

7

We'll Install

We agree a time and date convenient for you – our highly skilled installation team will visit and install your brand new environment.

8

9

10

We'll Maintain

Maintenance packages are available we will discuss these options with you.

Snoezelen® Sensory Rooms in **Airports**

Noisy environments, such as security beeping, crowd noise, and intense aeroplane sounds, can be difficult for some individuals to handle. For someone who is neurodiverse, or who may have sensory sensitivities or neurodevelopmental disorders, can present additional challenges when navigating the airport setting because of their sensitivities.

A Snoezelen® sensory room in an airport, much like one we designed for Gatwick airport (left), provides a bespoke safe space where they can take a break, reduce agitation, and help them regulate their sensory experiences, making the travel experience smoother for everyone involved.

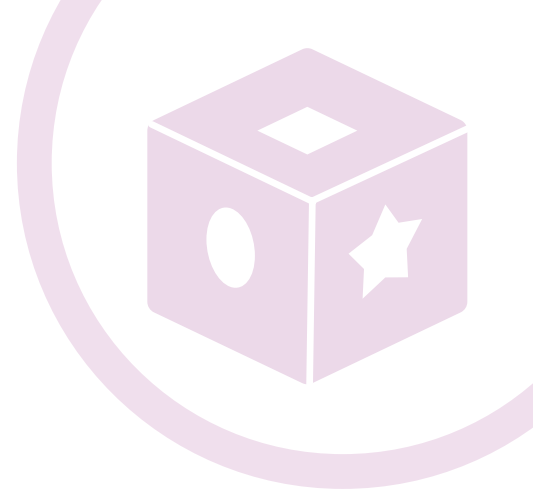

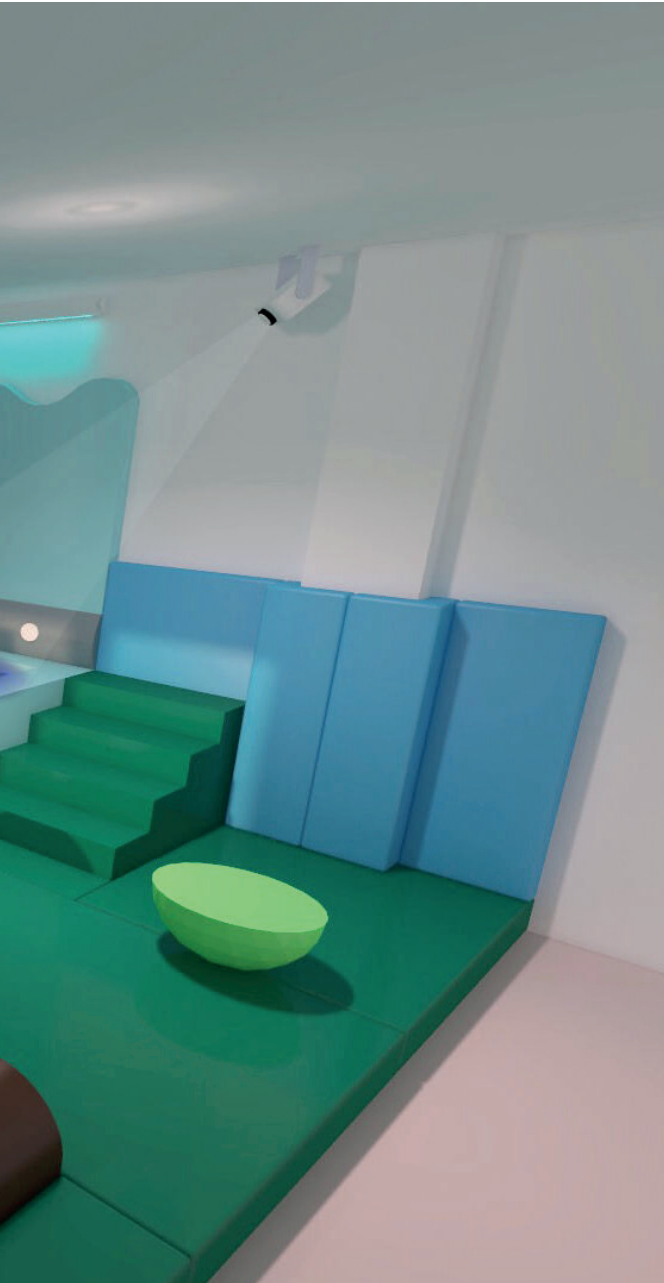

Snoezelen® Sensory Rooms in **Stadiums**

Sports and music venues have long been enjoyed by millions across the globe, and as a business focused on inclusion and accessibility, Rompa® supports the ambition that no-one should be excluded.

Events that attract large groups of people, tend to be noisy and crowded, which can be overwhelming for some individuals. Having a sensory space can reduce the overstimulation produced by mass noise and distractions and be able to watch in a calming environment.

Rompa® are proud to have specially designed, manufactured and supplied five sensory rooms to stadiums and fan zones surrounding Doha for the Qatar World Cup 2022 including the Snoezelen® room located at the Al Bayt Stadium.

Snoezelen® Sensory Rooms in

Activity Centres

Activity centres aim to provide recreational activities for individuals of all ages and abilities. Including a sensory room can boost inclusivity and belonging and ensures everyone has equal access to a leisure environment.

Whether it be a Snoezelen® sensory room, Soft Play or Sensory Integration room, it gives opportunity for individuals to calm and stimulate after engaging in physical or mental activity.

Much like a Soft Play room, it offers therapeutic and entertainment benefits.

Snoezelen® Sensory Rooms in

Work and School Environments

Many individuals have sensory sensitivities that make it challenging to work or learn in typical environments. Having a sensory space in a learning or working environment brings a dedicated space to allow an individual who may have behavioural or neurological challenges to regulate their emotions to help reduce stressful or anxiety-inducing situations. Providing an amenity like a sensory room can contribute to higher retention rates, increased job satisfaction, and improved academic outcomes.

An annual investment of £850m, from the government, is going to schools over the next few years, to create new places for young people with Special Educational Needs and Disabilities (SEND) and in Alternative Provisions. A portion of this being awarded to sensory room installations, in mainstream and SEND schools.

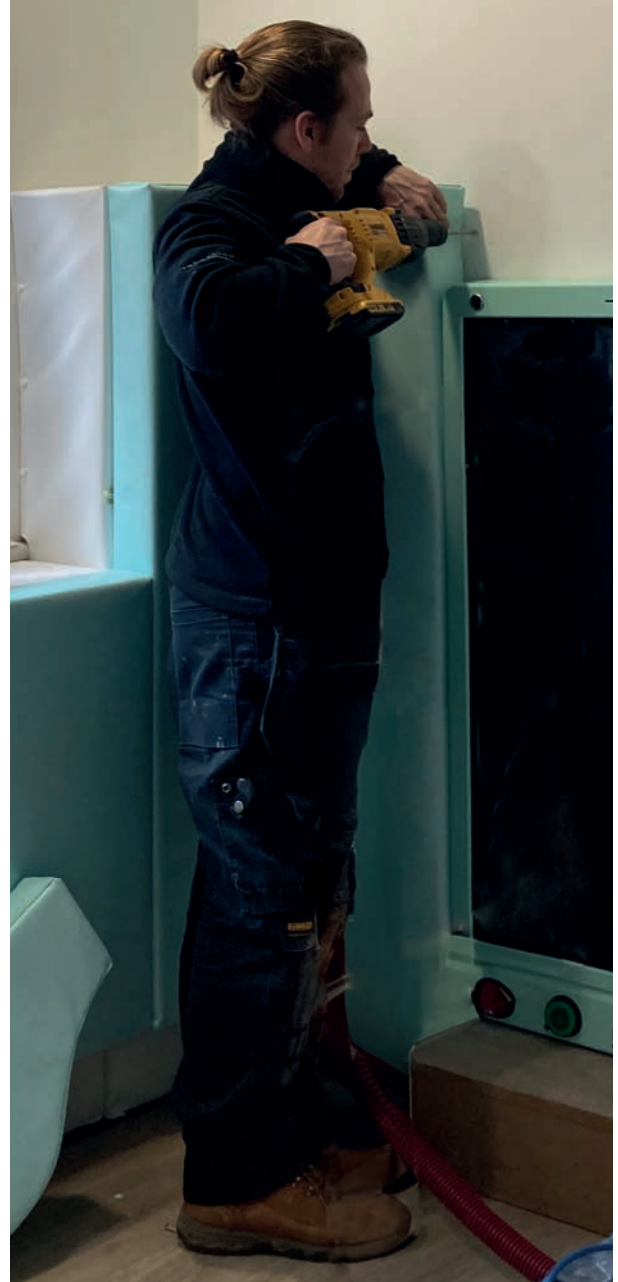

Snoezelen® Sensory Rooms in

Public Spaces

Snoezelen® sensory rooms can be beneficial in a wide range of public spaces to accommodate individuals with sensory sensitivities, disabilities, or those who simply need to de-escalate.

There are no limitations to where sensory rooms can be utilised. Some installations in the past we have designed are located in prisons, building societies, dentists (pictured left), health centres, community centres, shopping malls.

Training and Aftercare

Snoezelen® Training & Aftercare

Whatever you need, call 01246 211 777 or email installations@rompa.com to contact a friendly customer service advisor who will help you.

Additional Training

We understand that the people using your new environment could change over time, or that some of your team may not be available when the initial training session takes place. We do offer refresher courses and other training packages – speak to the sales advisor or call one of our customer services representatives to find out more.

Service Agreement

Service agreements for your installed environments are available. They are based on each individual environment to ensure best value for money. A quote for a service agreement will be sent out with your main quotation for the environment.

Warranty Information

We take pride in the manufacture of our products and believe we are the market leaders regarding quality, price, durability and longevity. It is for these reasons that we are proud to offer a 2 year warranty on all Rompa® manufactured products.

Installation works undertaken by Rompa® are also covered by a 2 year warranty.

snoezelen®

Testimonials

“The entire design process was made easy due to the knowledge and expertise of the Rompa® team; they provided sound advice and suggestions for the room’s equipment and understood the needs of the users with ASD.

The finished room was installed to a high quality and even the training and hand over was of high quality, an all-round quality end to end process.”

**Project Co-ordinator
Harding Stone Academy**

The overall experience with Rompa® has been fantastic – from the initial discussions, site visits, phone calls with all our questions to the installation process. The installers were incredibly professional throughout the installation and made sure there was minimal disruption to our clinic and very knowledgeable about the equipment during the training.

We met them at a professional conference a few years ago and have ordered resources from them before so we were confident in the quality of their products.

**Hannah McDiarmid, Co-Director
Let's Verbalise**

The Rompa® team will help design your perfect bespoke sensory room – every step of the way.
